

## Radionet3-proposal: Selection Committee Meeting JRA/NA, 10/08/2010

### Max-Planck-Institut für Radioastronomie, Bonn

#### – Evaluation Results of the Networking Activities–

Selection Committee: F. Mantovani (Chair RadioNet2), A. Zensus (Co-ordinator proposal RadioNet3), H. van Langevelde, P. Cox, R. Laing, E. Limiti, S. Rawlings, L. Testi, M. de Vos

*NA Coordination of large survey efforts using the next generation of radio/mm instruments;  
Sender: R. Beswick*

Giving the limited budget it could not be selected as an individual NA. The Committee liked some of the ideas of the activity, especially when it concerns the link between ALMA and SKA pathfinders and it suggests that the NA Science Working Group will support two meetings on the subject and that the NA New Skills also gives some attention to making sure the use of the SKA pathfinders is stimulated.

The Committee recommends this group to contact the PIs of the suggested two NAs.

#### Networking Activities – Received Short proposals

NA	Submitted by
<i>RadioNet3 Management</i>	A. Zensus
<i>Science Working Group</i>	<i>T. Venturi</i>
<i>New Skills for Radio Astronomers</i>	<i>A. Richards</i>
