

## Radionet3-proposal: Selection Committee Meeting JRA/NA, 10/08/2010

### Max-Planck-Institut für Radioastronomie, Bonn

#### – Evaluation Results of the Networking Activities–

Selection Committee: F. Mantovani (Chair RadioNet2), A. Zensus (Co-ordinator proposal RadioNet3), H. van Langevelde, P. Cox, R. Laing, E. Limiti, S. Rawlings, L. Testi, M. de Vos

*NA The European Ambitions in Radio Astronomy – Sender: H. van Langevelde*

This NA was seen to be broad and not feasible. Since *the importance of broadening the community* was recognized, it was recommended to include this aspect in the new NA Long-term Perspective.

*NA Long-term Perspective (Working title); to: H Van Langevelde, M. Garrett, S. Varano & A. Zensus*

The Committee proposes to combine in this NA elements of SERA and European Ambitions. This NA should have focus on a) policy to new facilities (building bridges between ALMA&SKA), b) policy towards new countries and c) outreach aspects (outside the community). The policy aspects of this NA should be handled on Board level (e.g. in conjunction with Board meetings). The policy aspects are supposed to produce clear deliverables. NA VC-Net shall be included in this new NA. The total budget was set to 150.000€.

The Committee recommends that the ESKAC fees shall not be subject of this NA, It is recommended to allocate some budget for board meeting travel costs. Furthermore a budget for 2 PM of the project scientist and outreach material shall be included.

The Committee proposes that the PIs of the above named NAs, i.e. M. Garrett, H. van Langevelde, S. Varano and RadioNet3 co-ordinator, should define together a NA based on the here recommended structure.

#### Networking Activities – Received Short proposals

NA	Submitted by
<i>RadioNet3 Management</i>	A. Zensus
<i>Science Working Group</i>	T. Venturi
<i>New Skills for Radio Astronomers</i>	A. Richards
<i>Radio Astronomical Spectrum Management</i>	A. Jessner
<i>European Technical Forum (ERATec)</i>	R. Keller
<i>NEW: Long-term Perspective (Working title)</i>	Receiver: H. van Langevelde, M. Garrett, S. Varano & A. Zensus
<i>Structuring European Radio Astronomy (SERA)</i>	M. Garrett
<i>The European Ambitions in Radio Astronomy</i>	H. van Langevelde
<i>VC-Net</i>	S. Varano
<i>Coordination of large survey efforts using the next generation of radio/mm instruments</i>	R. Beswick
<i>Synergy between Radio Observatories</i>	K.-H. Mack
