

1st day

Not much achieve. Just discussed the obvious: what should be offered to the users.

2nd day

1. Presentation by Harm: VLBI monitor
 - Client server model for monitoring at stations. Normal setup, but only central database. Webfrontend.
 - 3 antennas participated: SMT, LMT, JCMT
 - Futute: Dashboard,
 - Could parse logs of FS and Mark 6.
2. Start working on the Google docs document 1a
3. Action for 1b: Check for DBBC3 requirements!!
