

MM013C Correlation Report

General information

- A part of [C181D](#)
- **No ALMA participation** in this part
- Targets: BLLAC, 2013+370
- Session info: <http://www3.mpifr-bonn.mpg.de/div/vlbi/globalmm/>
- Station feedback: http://www3.mpifr-bonn.mpg.de/div/vlbi/globalmm/sessions/apr18/feedback_apr18.asc
- GBT calibration info (Tsys files for download) and other related information for this session can be found here:
<https://safe.nrao.edu/wiki/bin/view/GB/Observing/WbandVLBACal/C181>
- Because this experiment was processed together with ALMA observations, *special processing* was applied to all data in order to correlate mismatching frequency setups of ALMA and other GMVA stations. See details [here](#). This should not have influenced non-ALMA scans.

Current Status

Correlation finished, **released** on 10/12/2018.

A **second** data release, with a problem, spotted in the original release, corrected, was made on 31/01/2019.

Notes

There were problems with some diagnostic plots of this experiment due to yet poorly understood errors of fourfit and other HOPS components. But this does not change the quality of the final correlation product. (*These issues were fixed in the second data release of 31/01/2019*)

GLT participated in this session for the first time as a test, and serious problems were detected when analysing its data. Be very carerful when using them.
