Notes

- 1. Pv did not participate in the fringe test due to bad weather. However fringes were confirmed using a scan of c212a.
- 2. Ys had a technical issue that prevented fringes during the fringe test. The issue was fixed UT 8:00 day 91 (April 1st) during c212a. A first fringe check reveled missing quarter wave plates. First good scan is 091-1415 in c212a (confirmed fringes).
- 3. Mh missed scans 2 and 3
- 4. Nn changed reference antenna after scan 5 to A5 (on pad E10).
- 5. Nn stopped after scan 7 due to high winds
