

These are notes for the first go on replacing gxhive with ansible.

## Setup

ansible master: frontend

ansible installed in a pythynv virtualenv. Activate with;

```
source /root/venv/ansible/bin/activate
```

Ansible files are stored under /root/ansible-cluster

## Structure

Tried to follow best practices directory layout; see: [https://docs.ansible.com/ansible/2.8/user\\_guide/playbooks\\_best\\_practices.html](https://docs.ansible.com/ansible/2.8/user_guide/playbooks_best_practices.html)
