Did you know that MindTouch has out of the box **Collaborative Intranets**?

- **What makes a good Intranet?**

  MindTouch Intranets tightly integrate projects, content management, teams and search into a single out of the box intranet solution.

  MindTouch Intranet

  Leverage user contributions to build your intranet and establish community champions.

- **Authentication**

  Authentication with MindTouch is flexible and powerful. MindTouch enables you to leverage your existing authentication providers such as LDAP/AD for a seamless **single-sign-on** experience.

  add authentication

  Intranet Setup

  Setting up your intranet is a snap. Set up team and department pages, dashboards and projects with just a few clicks.

  Use MindTouch permissions to grant users access to specific hierarchies.

- **User / Role Management**

  User management with MindTouch is easy, extensive and versatile. Create new users, roles and groups in the control panel.
